

## Stage 1 Water Restrictions – Correction Notice

Attn: City of Devine Customers

The Public Notice that was in the Devine Newspaper on August 12<sup>th</sup> stated that the City of Devine was in Stage 1 Water Restrictions as of July 9, 2020. However, July 9, 2020 was when The Edwards Aquifer Authority (EAA) declared Stage 1. The City of Devine is in a unique situation because we also have Carrizo Wells. So, we were able to avoid going on water restrictions at that time, when other cities were entering Stage 1. Since we still pump a significant amount of water from the Edwards Aquifer, we are asking customers to start conserving water.
